

Datastore Announces Acquisition of Madison Records Center

Acquisition Complements Datastore's Growth in the Madison Business Community

Madison, WI March 15, 2011 – Datastore, the region's trusted provider of advanced information management solutions today announced that it has completed the acquisition of Madison Records Center. The acquisition, which formally closed on March 10, 2011 - represents the continued expansion and growth of Datastore as the premier provider of records and information management solutions to the Madison, Milwaukee and Chicago business communities.

Madison Records Center has been in business for over 25 years and represents a solid, respected name in the Records Management community within the Madison market. Through this acquisition, customers of Madison Records Center will now become Datastore clients and have access to the full portfolio of advanced information solutions Datastore offers to its clientele. Kyra Wieland, former owner and operator of Madison Records Center will remain employed by Datastore along with the rest of the Madison Records Center employees.

"We are very excited to have the opportunity to join the Datastore family," stated Kyra Wieland, former owner of Madison Records Center. "As a part of Datastore, we can now offer an expanded suite of solutions for our clients such as Document Scanning and Conversion services as well as SharePoint-based Document Management and Content Management solutions." "Datastore is proud to have Kyra and her team join Datastore and we welcome all of the clients of Madison Records Center (MRC) to the Datastore family" said Mike Ball, President of Datastore. "We look forward to delivering the same quality of services to these customers along with our advanced information solutions which can be a significant value-add to the services previously provided by MRC."

This acquisition further demonstrates the commitment Datastore has to be the leading provider of information solutions to the Madison community". The operations and servicing of Madison Records Center clientele will be fully integrated into Datastore's Madison Regional Operation's Center which is located in the Sun Prairie Business Park. The integration is expected to be completed this summer. This growth is in simultaneous with the growth of Coakley Brothers moving and warehousing operations at the Sun Prairie location, which has added 5 new employees within the past year.

About Datastore

Datastore (a Coakley Brothers Company) is the leading provider of advanced information management solutions for both electronic (digital) information as well as physical information (records storage). With a legacy of over 35 years and now the largest provider of services in the Milwaukee – Madison – Chicago business communities, Datastore serves over 500 business organizations with a modern portfolio of services and solutions including innovative document imaging and management (ECM) for Microsoft SharePoint, traditional Windows-based ECM and document management systems, production document scanning and imaging services; offsite records storage and management; computer media/tape vaulting and rotation; as well as confidential information destruction and shredding. Datastore is a Microsoft-certified Partner and the only full-service information management provider certified to deliver solutions and services for the Microsoft SharePoint user community.
